PUBLIC CHARTER SCHOOLS

Partnering with ECS Learning Systems to turn struggle into understanding, learning into mastery, and confidence into the catalyst for success.

Virtual tutoring for Math, grades 4-8, and Algebra I, delivered to 100 students

Customized scope and sequence based on STAAR MASTER® materials

Tutoring provided by Texas educators with an average of 12 years of classroom experience

THE CHALLENGE

Based on mid-year assessment data, Odyssey Academy needed a tutoring program to provide Math instructional scaffolds to 100 students in grades 4-8 and Algebra I.

The tutoring sessions needed to be delivered virtually and expand to a five-week period prior to the State of Texas Assessment of Academic Readiness (STAAR®).

In addition, the program needed to be aligned with the state standards and to prepare students for the state assessment format.

THE SOLUTION

Odyssey Academy partnered with ECS Learning Systems to provide their students with impactful tutoring sessions using state-aligned curriculum materials and Texas educators as tutors.

A customized scope and sequence was created for the academy and followed using STAAR MASTER® materials that reflect the standards, level of rigor, and test item specifications of the STAAR®.

Virtual tutoring sessions were 30 minutes and were held three times a week.

THE IMPACT

From the first week of the high-impact tutoring sessions, educators at Odyssey Academy saw success in their students.

Teachers implementing the program reported the students' confidence levels increased each week on formative measures.

With the average attendance rate at 80%, students received weekly targeted instruction to close academic gaps and build mastery on targeted standards.

“With an ambitious goal our ECS Learning Sales Rep took the time to truly understand our vision and provide us with an organized, proactive project manager who communicated frequently and led the reliable and qualified tutors to fulfill everything we needed.”
